## PROFESSIONAL SUMMARY

Researcher with a PhD in Finance and extensive experience in quantitative credit and climate risk analytics. I develop data-driven risk models and analytical tools for default risk and climate risk using machine learning methods and large-scale financial datasets. My work focuses on translating complex financial data into actionable risk measures and evidence for risk management and decision-making.

## SELECTED APPLIED PROJECTS

### Financial Risk Meter

Systemic risk / network analytics

A Quantile-LASSO-based measure for estimating systemic interconnectedness across assets through tail-risk spillovers in an ultra-high-dimensional setting.

### Carbon Risk Dynamic Indicator (CARDI)

Climate finance / ESG analytics

An indicator that captures systemic and time-varying carbon risk by predicting relative tail-event measures between high- and low-carbon firms.

## EXPERIENCE

|                 |                                                                                                                              |
|-----------------|------------------------------------------------------------------------------------------------------------------------------|
| 2024.12–present | <b>Postdoctoral Researcher</b> , School of Energy and Environment, City University of Hong Kong. Hong Kong Scholars Program. |
| 2023.02–present | <b>Postdoctoral Researcher</b> , Business School, Sun Yat-sen University.                                                    |
| 2023.12–present | <b>Research Fellow</b> , IDA Institute for Digital Assets, Bucharest University of Economic Studies.                         |
| 2021.01–2022.01 | <b>Visiting PhD Researcher</b> , Ladislaus von Bortkiewicz Chair of Statistics, Humboldt-Universität zu Berlin.              |

## EDUCATION

|                 |                                                                                                                                                             |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2018.09–2022.12 | <b>PhD in Finance</b> , Sun Yat-sen University. Dissertation on rigid payment, debt financing, capital misallocation and machine-learning causal inference. |
| 2014.09–2017.06 | <b>MSc in Financial Management</b> , Zhongnan University of Economics and Law.                                                                              |
| 2010.09–2014.06 | <b>BSc in Financial Management</b> , Zhongnan University of Economics and Law.                                                                              |
